RE: Submission in support of Consent application

Application Number: CP-2022-111365-00 / CD-2022-111366-00 / CC-2022-111367-00 / CR-

2022-111368-00 / CO-2022-111369-00 et all

Juken New Zealand is making this submission on behalf of the company, its employees, contractors, suppliers and all the associated companies that support and benefit from the business JNL brings to the region.

JNL is a substantial forestry and manufacturing company on the East Coast and has been witness first hand to the complications, frustrations and increased costs around a restricted port, this has not only effected our business and our ability to increase profits, it has created huge instability within our organisation and has seriously affected business confidence in the region. With forestry being such a big part of the East coast, any small impact on our industry has far reaching implications to our businesses and communities.

This consent and expansion would mitigate many of the risks we are facing in uncertain times, create further opportunities through container export out of Gisborne reducing costs to businesses and transport on our road infrastructure. More importantly it will create stability within our region ensuring we can attract and retain valuable resources, providing a more sustainable future for so many people that depend on JNL and our business.

With an uncertain and largely unpredictable future for business, all efforts need to be made to ensure we are best placed to manage volatility and uncertainty in markets effected by global changes. A successful consent application would offer the first step in the right direction in building business and investor confidence and ensuring us as responsible leaders are looking after our communities.

For the above reasons Juken New Zealand fully supports the consent application, and we looking forward to the success and stability this port project will bring to our area.

Kind Regards,

Shaun Truelock

Regional Manager

JNL East Coast
